READING GUIDE

Intraday Support and Resistance levels

Pivot is where there is mathematically balance in the market. It acts as both a strong support and a strong resistance level depending on where the market is trading ie. above or below the **pivot**

Support levels

There are 3 strong support levels in the FX markets. In the matrix above, they are called **1st sup**, **2nd sup** and **3rd sup**

Resistance levels

There are 3 strong Resistance levels in the FX markets. In the matrix above, they are called **1st res**, **2nd res** and **3rd res**

The trading range on a normal trading day is usually between **1st sup** and **1st res** indicated by the **red** and **green** band.

Midpoints

In between Support and Resistance levels there are minor support and resistance levels; so-called mid-points indicated by **mp1st sup**, **mp2nd sup** and **mp3rd sup** AND **mp1st res**, **mp2nd res** and **mp3rd res**

S1/R1 Band

Shows the difference between 1st sup and 1st res in pips.

%B: Information of where in the **S1/R1 Band** the market is trading *at the time of publication* (printed in the top left corner) in percentage calculated from **1st sup**. 62.61% indicates the **Last** price is 62.61% from the **1st res**.

%Pivot

Indicates where in the **S1/R1 Band** the **Pivot** point is placed ie. 50% means it is placed exactly in the middle of the band between **1st sup** and **1st res**. A number above 50% means the **Pivot** is placed closer to the **1st res** and a number below 50% means **Pivot** point is placed closer to **1st sup**.

Last

Last is the price of the market at the time of publication.

The **blue** fields shows in which range the specific security has been trading until the time of publication.

For every security two numbers will be **highlighted**. The specific security is trading between those two numbers at the time of publication.

This report has been prepared by Financial Trend Analysis - hereinafter FTA

Expected updates

Today's Technical Trading Points are updated daily

Financial models and/or methodology used in this report

Technical analysis is a method of evaluating securities by analysing statistics generated by market activity, past prices, and volumes. Technical analysts look for patterns and indicators on charts that could determine future performance. Various technical analysis models and methods are used to evaluate the market.

IMPORTANT NOTICE

RISK WARNING

THE ESTIMATE OF THE FUTURE PERFORMANCE OF (FINANCIAL) INSTRUMENTS, SEE ABOVE, IN THIS REPORT MAY DEVIATE FROM THE ACTUAL PERFORMANCE OF THE INSTRUMENTS. HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN INHERENT LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. IN ADDITION, SINCE SOME OR ALL TRADES HAVE NOT ACTUALLY BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY OR FAST MARKET CONDITIONS. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM.

ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES (AND INCUR ACCOUNT DRAW DOWNS) OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE IMPORTANT ISSUES WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS.

ONLY RISK CAPITAL SHOULD BE USED FOR FOREX, COMMODITIES, FUTURES AND OTHER FINANCIAL INSTRUMENTS TRADING DUE TO THE HIGH RISK OF LOSS.

THE CALCULATED RISK/REWARD SHOULD BE REGARDED AS HYPOTHETICAL ALSO AND AS AN ESTIMATE OF POTENTIAL GAIN AND LOSS. THE CALCULATIONS DO NOT TAKE TRADING COSTS AND SPREADS INTO ACCOUNT.

THERE WILL HOWEVER, BE CALCULATED A SLIPPAGE WHEN THE HYPOTHETICAL PERFORMANCE IS BEING CALCULATED.

DISCLAIMER

This publication has been prepared by FTA for information purposes only. This publication is not an offer or solicitation of any offers to purchase or sell any securities, currency or financial instrument. The information contained herein is solely for informational purposes. Any charts and other opinions constituting the information contained herein are, and must be construed solely as statements of opinion and not statements of fact, recommendations and/or trading advice. FTA cautions that no single source of information should be used when making trading decisions. Whilst reasonable care has been taken to ensure that its contents are not untrue or misleading, no representation is made as to its accuracy or completeness and no liability is accepted for any loss arising from reliance on it.

FTA believes that the information contained herein is accurate however; FTA cannot guarantee the accuracy of said materials. Under no circumstances shall FTA or its staff have any liability to any person or entity for (a) any loss or damage in whole or in part caused by, resulting from, or relating to, any error (negligent or otherwise) or other circumstance in connection with the collection, compilation, analysis, interpretation, editing, transcription, transmission, communication, publication or delivery of such information, or (b) any direct, indirect, compensatory or incidental damages whatsoever (including without limitation, lost profits) resulting from the use of or inability to use any such information. The author and publisher of this report shall not be liable for any loss of profit or any other commercial damages, including but not limited to special, incidental, consequential or other damages.

Customers should be aware of the risks associated with over-the-counter, spot Forex trading. In the off-exchange market, also called the over-the-counter market, a retail customer trades directly with a counterparty and there is no exchange or central clearing house to support the transaction. Trading forex, commodities and other financial instruments is highly speculative in nature, which can mean prices may become extremely volatile. Forex trading is highly leveraged. Since low margin deposits normally are required, an extremely high degree of leverage is obtained in over-the-counter trading. A relatively small market movement will have a proportionately larger impact on the funds you have deposited. You may sustain a total loss of your funds. Since the possibility of losing your entire cash balance does exist, speculation in the over-the-counter market should only be conducted with risk capital you can afford to lose and which will not dramatically impact your lifestyle.

As each individual situation is unique, questions relevant to personal finances and specific to the individual should be addressed to an appropriate professional to ensure that the situation has been carefully and appropriately evaluated. Any advice is general and does not take into account your objectives, financial situation and needs. You should always consider whether it is appropriate for You.

FTA or staff may perform business services, hold, establish, change or cease to hold positions in any securities, currency or financial instrument mentioned in this publication.
